Final Project Update

All lanes are now open, and the Highway 3 Twinning Project is now substantially complete.

Ledcor would like to take this opportunity to thank all project stakeholders, local communities, businesses, landowners, field personnel, and the travelling public for their patience, cooperation, and support throughout construction.

The successful delivery of this project is a reflection of the commitment, collaboration, and hard work of many individuals and organizations. Most importantly, we would like to recognize the dedicated field workers who spent countless days and weeks away from their families and friends, working through challenging conditions to help deliver a safe and successful project.

We also appreciate everyone who worked alongside us throughout the project, as well as those who adjusted their daily travel routines while construction was underway.

While the project is substantially complete, our crews will remain in the area completing final cleanup activities and other minor finishing work. Please continue to watch for workers, equipment, and temporary work zones, and obey all posted signage and speed limits.

Please continue to do your part: stay alert, slow down around workers and work zones, and drive safely.

On behalf of everyone on the Ledcor Highway 3 Twinning Project team, thank you for your support, and safe travels.
